Safety Data Sheet

Fire may produce irritating, corrosive and/or toxic gases.

Special protective equipment and precautions for fire-fighters

Move containers from fire area if you can do it without risk. Be careful not to cause environmental pollution by the outflow of fire extinguishing agent or dilution water. Wear proper protective equipment. Extinguish fire from windward as much as possible.

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

Workers must wear appropriate protection equipment (refer to Section 8) and work from upwind. Isolate the site as a leak area by providing a zone that has an appropriate width to all directions. Prohibit unauthorized entry into the area.

Methods and materials for containment and cleaning up

Stop leak if you can do it without risk. Collect spillage as much as possible.

7. Handling and storage

Precautions for safe handling

Use in a well-ventilated area. Wash contaminated areas thoroughly after handling.

Optimal operating temperature: 15-28°C

Conditions for safe storage, including any incompatibilities

Store in a well-ventilated area.
